

Serious Security

We understand how important your data is to you, so we go to great lengths to keep your data yours. Want more information? Contact Accio Data at 888.450.2060.

Round the clock Monitoring.

The data center is staffed and monitored 24x7. All access is logged and restricted via visual photo identification. In addition, security cameras record all entrances and exits, the external generator, and the front and rear of our rack space.

Locked rack space. All of our equipment from the first cisco in is stored in locked cabinets in the data center, only authorized personnel are allowed access.

Password quality.

All passwords must use at least two character sets (lowercase, uppercase, numbers and symbols). Minimum password length and expiration interval are configurable on a client by client basis to meet your security requirements.

Password storage.

All passwords are stored in one way hashes (original password is not decryptable) using at least 128 bit one way encryption technology.

Password expiration.

All passwords expire. Expiration interval is configurable client by client to meet each customer's security needs.

Access restrictions.

Multiple end user settings can be used to restrict access to information from identifier redaction to level of data viewable (all reports, only reports with no derogatory info, only report summaries).

Inactivity logouts.

Inactivity logout timers are applied to all sessions. Timeout length is configurable client by client to meet their security requirements.
